

NJ21United

NJ21United is a coalition of educators and community members who care about public education and public workers in New Jersey.

Our belief is that our NJ public school students deserve:

- **Public schools that are fully funded**
- **Access to quality educational resources and supports**
- **Highly qualified, exceptional, and experienced public school employees who are fairly compensated with salary and benefits**
- **Unionized school employees, including support staff with job protections**

The recent proposals and discussions that are being held by our legislative representatives have the potential to negatively impact our public schools. Public educators have the right to demand respect to ensure that the education that all children need and deserve is available.

#Red4Ed Demands

Restore public school funding to pre-recession levels through corporate tax accountability.

Access to affordable quality healthcare.

No more pension give-backs.

Competitive pay and job protections for all education support staff.

An end to public funding of charter school systems without accountability.
